Q: What are your organizational goals?

A: LSI is committed to providing manufacturing, production and training support for tracked and wheeled vehicles, unmanned ground vehicles, optionally manned fighting vehicles, and robotic combat vehicles. LSI's portfolio of services includes training devices, virtual reality solutions, and courseware development for operators and maintainers both CONUS and OCONUS.

Q: What is something unique about your product or service?

A: LSI has been providing full-spectrum training solutions to the Department of Defense (DoD) for over 40 years, delivering large business capabilities while remaining a small business under manufacturing NAICS codes. LSI can successfully support OEMs, filling small business requirements while providing our extensive knowledge and capabilities as a trusted training provider for warfighters. As a training device manufacturer, LSI utilizes both hardware and software products to prepare, train, test, and enable technicians and operators. LSI can design, manufacture, and deploy worldwide, providing ground-up design and rapid prototyping. Capabilities include mechanical, electrical, and software engineering design, manufacturing, 3-D modeling and printing, assembly, test, overhaul, and modification requirements.

Q: What are your teaming goals within NAMC?

A: LSI's teaming goals include partnering with OEMs to provide full-spectrum training solutions for technicians and operators that include the design and manufacturing of Part Task Trainers, High-Fidelity Devices, Virtual Reality Trainers, Interactive Multimedia Instruction (IMI), Instructor Services, and Technical Publications. In addition, LSI can provide support for the OEM's surge manufacturing and production requirements.

Capabilities:

Training Devices, Courseware, Manufacturing & Production, Instructor Services
